Trip Overview

Manaslu Circuit Trek is one of the best treks to undertake in Nepal. Being one of Nepal's lesser-traveled destinations, this trail's peace and solitude are unparalleled. The scenic views of Manaslu and other mountain ranges, including the Annapurna range, are a joy to watch. Flanked by Ganesh Himal to the east and the Annapurna Range to the west, standing tall at 8163 meters, Manaslu is one of the most graceful 8000-metered giants.

Manaslu region lies above the foothills of the Gorkha district. We will meet people of numerous ethnicities like Brahmins and Chhetris in the lower areas and the Gurung people in the higher regions. The Gurungs of this region follow Tibetan Buddhism. The Manaslu circuit takes you from the steamy lowlands with their rice millet terraces through the mighty gorges of the Budi Gandaki with its turquoise waters and impressive waterfalls. The suspension bridges in the Manaslu region are quite an experience due to their sheer height and length. Moreover, the monsoon rain often washes the minor bridges away, leaving semi-submerged rocks to cross the rivers.

The trail was initially opened to trekkers in 1992; this trek still feels like a walk into the past. If you want to know what trekking felt like in the 80s, the Manaslu circuit is the way to go. However, you better be fit as the trail is rather demanding. Our journey to Manaslu begins with a tour of **Kathmandu's UNESCO World Heritage** sites. The short tour is followed by a drive to Gorkha, a historically significant site in the history of Nepal, from where we start our trekking journey. Our journey begins from lush green hilly areas to the rocky and icy mountains to the north, thus enabling you to see the changing vegetation throughout the trek.

With its remoteness and secluded solidarity, it is considered different from trekking in the Annapurna region, making 'Around Manaslu Trek' a first choice.

The eighth-highest peak in the world, Mt. Manaslu, is not just a 15-day trek but an experience of a lifetime. Our trip begins with sightseeing the UNESCO World Heritage Sites in Kathmandu. We visit Bhaktaour Durbar Square, Patan Durbar Square, Pashupatinath Temple, and Swoyambhunath Temple. Then, we go through the historically renowned (ancient) Kingdom of Gorkha in the southwest of Nepal. Our trip continues to the splendid Manaslu region.

Manaslu Circuit Trek Difficulty

Naata Travel & Adventures's 18-day around Manaslu circuit trek is designed for trekkers to accomplish the rather demanding trek with the utmost comfort possible. Being 18 days long, this trek demands good physical condition from its trekkers. For one, the terrain is rugged on this trek, and coupled with the high altitude and the length of the trip, one needs to have good endurance and fitness to enjoy the journey to the fullest. The average walking time in this trek is 5 to 7 hours per day. At the same time, the average walking distance is 10-18 kilometers per day. Like all the trips from Naata Travel & Adventures, acclimatization is well-placed to make your trip a worthwhile one.

Trip Itinerary

Day : Arrival in Kathmandu

Upon your arrival at the Tribhuvan International airport a representative from Naata Trek and Tours will be waiting for you at the airport displaying a playcard imprinted with your name. He/she will then transfer you to the designated hotel. In the evening we can enjoy a welcome dinner hosted by Naata Trek and Tours. Additional Trip Information

Best time to Trek Manaslu Circuit

Spring

Spring season begins in March and lasts till the end of May. It is the second busiest time of the year to trek in Nepal and one of the best. This season is the right pick if you are after warmer temperatures and blossoming flora and fauna. The days are long, the trail is ablaze with colorful rhododendron flowers, and the sky is clear, providing clear views of the Himalayas. The temperatures are cold during mornings and nights at the beginning of March, so wear adequate clothing.

Autumn

The Autumn season begins in September and lasts till the end of November. This is the trek peak season, and Nepal and trails are generally crowded. These months have pleasant daytime temperatures and extended spells of fine weather. This season has long been considered the best time to trek in Nepal. The dust is washed away by the monsoon rain, thus making the greenery even more pronounced and the sky more transparent. This is the best time to enjoy the views of the Himalayas, thus making it the busiest time of the year.

A worthwhile Trip: Traveling on a beaten trail teaches you a thousandfold compared to traveling a thousand times on a familiar road.

Note:

However, it is a controlled trekking route, allowing only well-organized trekking groups and agencies special permits for entry into this mind-boggling region. The Manaslu trekking route provides basic facilities with local eateries and the most basic accommodations illuminating local village life in Nepal.

Like all Naata Travel & Adventures's itineraries, 'Manaslu Circuit Trek' also ensures enough time for acclimatization. As much of the trek involves walking on mountain trails, it is necessary to have proper cardiovascular fitness. Furthermore, it is vital to note that trekking at altitudes above 3000m/10000ft is more demanding to the body than walking at low elevations.
